

Building Schools for the Future

The ACE Centre North can help you at all stages of the BSF process to ensure the needs of your SEN pupils are considered fully throughout - including 'Strategy for Change' and business case documents through to procurement and on-going relationships with suppliers. Our aim is to ensure that when new ICT solutions are put in place they will exclude no one.

Special Schools

We can work with and represent single schools or a group of schools during the planning process and attend meetings on your behalf to ensure that 'Special Educational Needs' are fully incorporated into the ICT specification.

ACE Centre North can work with you to:

- Assess your current provision, including local equipment audit
- Provide a benchmark to plan future improvements and progress
- Advise on 'Core' equipment for each Class, School and Authority
- Develop a vision for how technology will support your school's aims
- Staff development and training
- Identifying and using 'Legacy' equipment
- Accessibility testing
