2.17 kg (in backpack with tags)

- Logan
QED

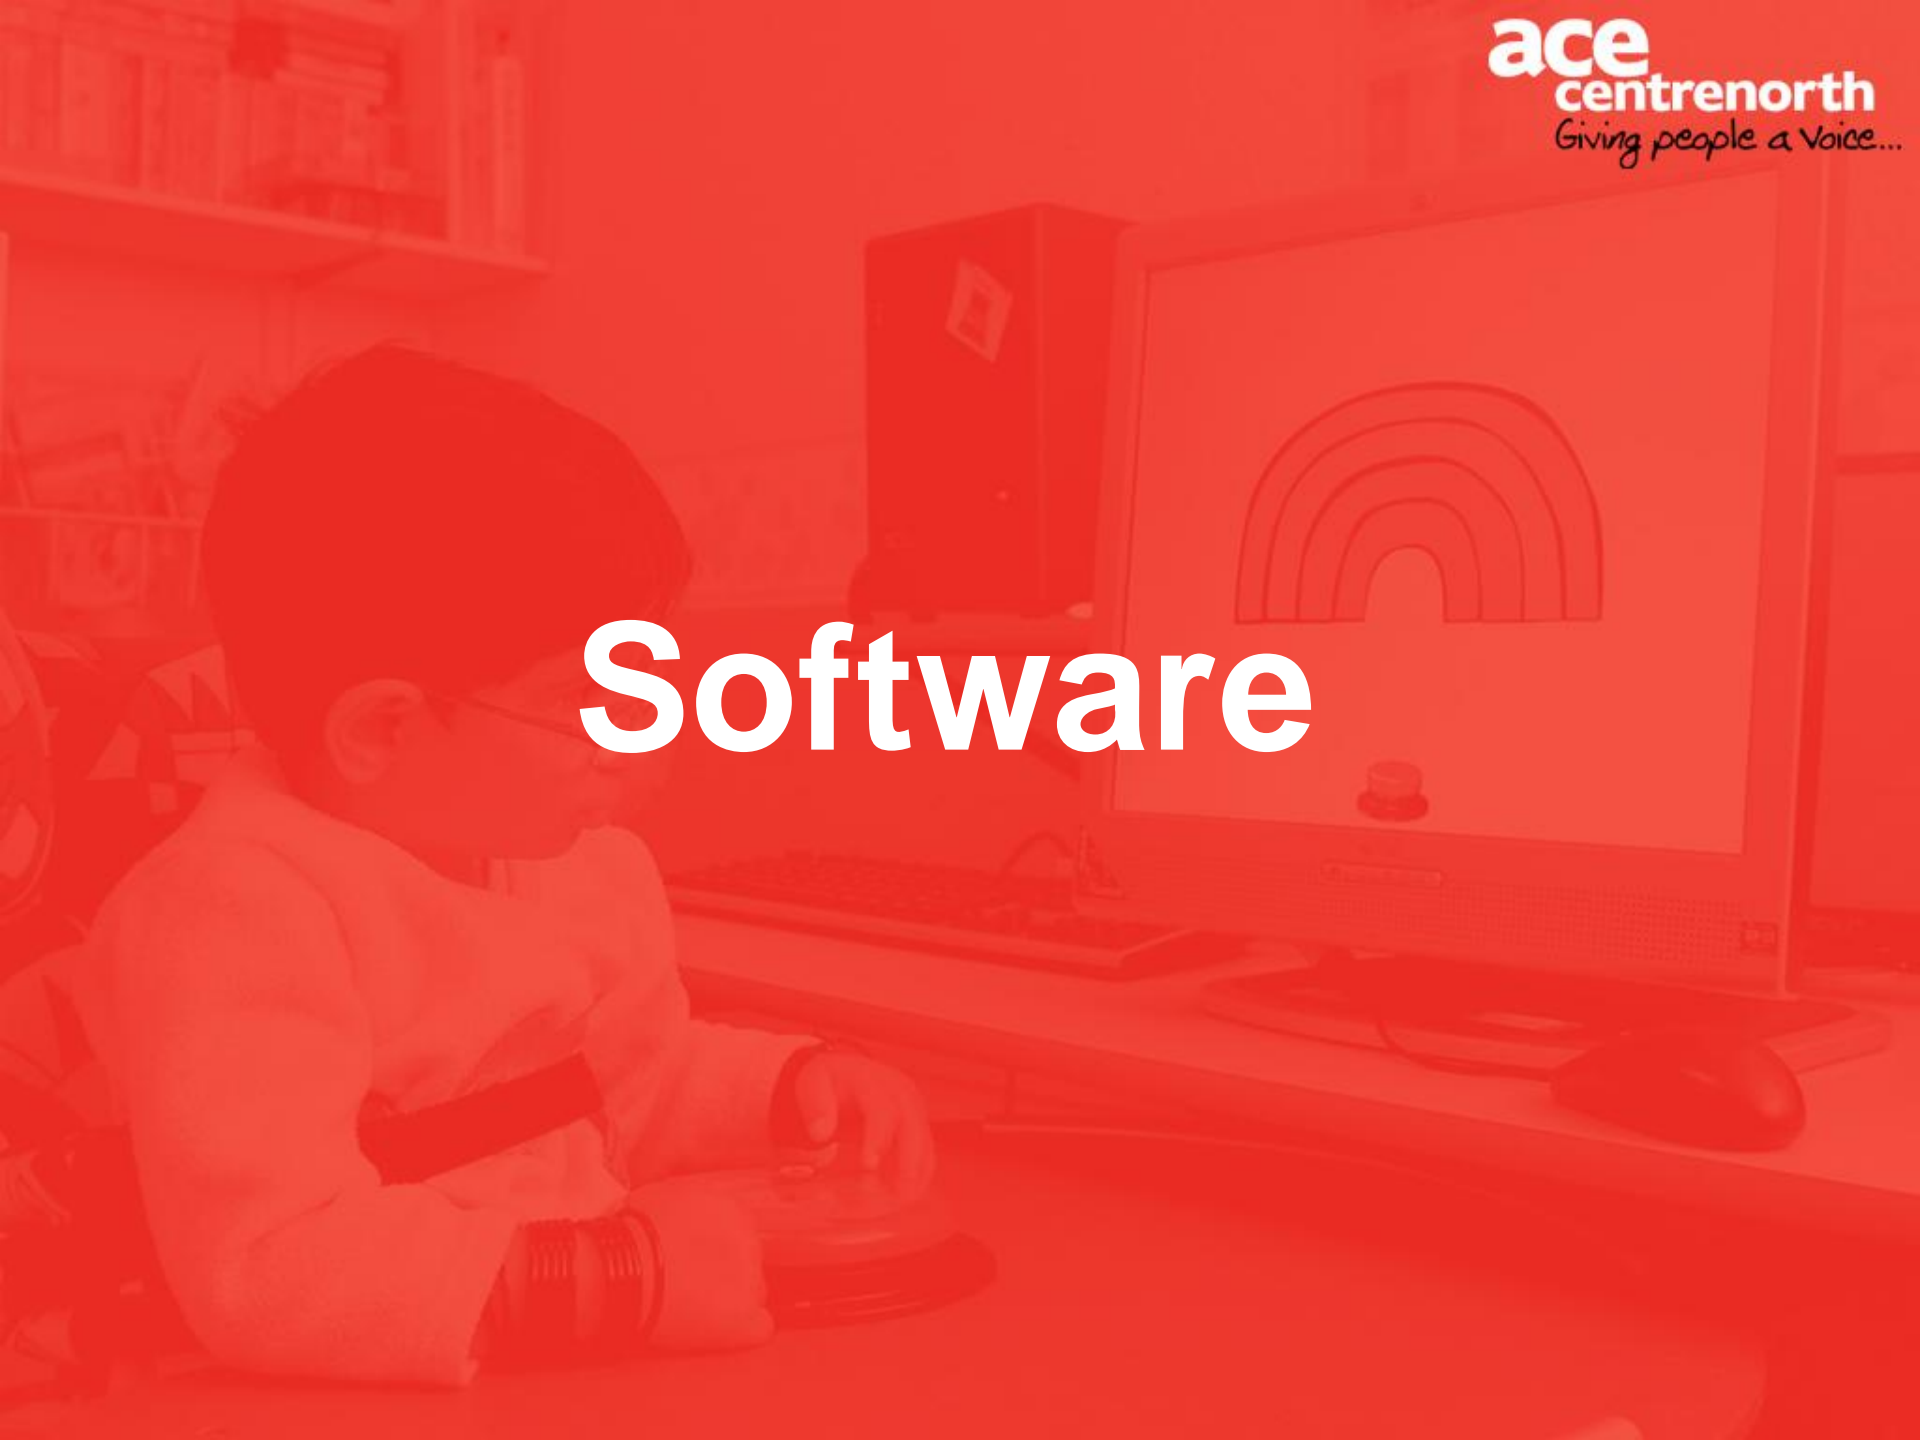

£1915

Logan Proxtalker

A communication aid designed specifically to address the needs of PECS users who are not ready for a dynamic screen device

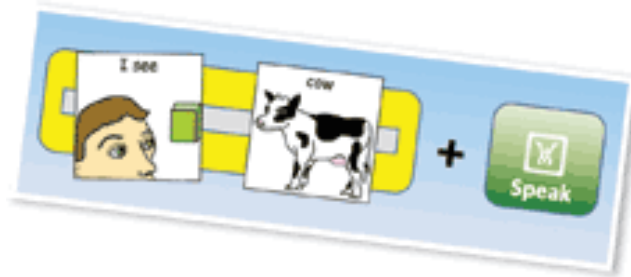

- Includes a five location voice output unit, standard binder with shoulder strap and 100 sound tags
- All recordings are stored on barcoded sound tags so the device knows which symbols have been placed on it
- Includes pre-printed standard tags (PCS), blank tags and special function tags (record, reset, volume up, volume down and check battery level)
- Can hold more than 10 000 words
- Battery operated with digitised speech

Software

Speaks4Me

Giving people a Voice...

- Speaks4Me

£1750 - £4000

Software emulating a PECS-like symbol strip, on a range of PC based devices

- Easy to learn and use
- Uses PECS images (though there are possible plans for PCS and Widgit symbols)
- Items are arranged in tabbed categories
- Items are touched (or clicked) and dragged to a virtual symbol strip and can be spoken back
- Supports over 20 different languages
- Other pictures can be added
- Can currently be purchased on a range of devices, portable, convertible and rugged
